- Highlight: **100 Meters Per Roll Interlining Fabric,
Tie Interlining Fabric, Interlining Fabric**

Product Description

Product Description:

The Tie Interlining Fabric is a high-quality interfacing textile essential for crafting durable and stylish neckties. It is also commonly utilized in reinforcing the structure in shirt plackets and cuffs. This product serves as the backbone for these fashion items, ensuring that they maintain their shape and crisp appearance throughout their use. Our interlining fabric comes in two types: polyester fiber and cotton. Different models correspond to different materials. 8050H, 8050M and 8050S are made of cotton. 8068, 3044S and 3044H are made of polyester fiber material.

The material composition is a key factor in the performance of the lining fabric. This type of tie lining fabric has excellent performance in softness, strength, and ease of maintenance, whether it is made of polyester fiber or cotton materials. Polyester fiber is known for its durability, wrinkle resistance, and ability to maintain shape, while cotton provides breathability and a soft, skin friendly touch. Both of these ensure that the tie maintains its shape and fits snugly against the body without affecting quality or comfort.

With a standard width of 110CM, this Tie Interfacing Textile is versatile and can be used in various designs and sizes of neckties. The width is ample for most tie patterns and allows for efficient usage of the material with minimal waste during the production process. Whether for slim, modern designs or wider, traditional styles, this interfacing fabric can be easily adapted to meet different fashion requirements.

As for its type, this product is specifically categorized as a Necktie Interlining. It has been designed with the needs of necktie manufacturers in mind, ensuring that it has the necessary properties to support and enhance the finished tie product. The interlining not only gives the tie the required body but also helps in tying a smooth and stable knot, which is essential for a well-rounded tie appearance. The use of this fabric extends beyond neckties. It is equally effective when used in shirt plackets and cuffs. In plackets, it helps to stabilize the front of the shirt where the buttonholes are placed, preventing sagging and misalignment. For cuffs, it provides the needed stiffness and form, allowing them to stay crisp and hold up against the rigors of movement and wear. Thus, this Tie Interlining Fabric is a versatile material that can be utilized in various parts of men's and women's garments that require a structured yet comfortable interface.

Color is another crucial aspect of interlining fabrics, and this product comes in a clean, white hue. White is the preferred choice for many manufacturers as it offers a neutral base that does not interfere with the colors or patterns of the outer fabric. It ensures that the vibrancy of the tie or shirt's design remains unchanged, while providing the necessary interlining benefits. The white color also adds to the product's versatility since it can be used with a wide range of fabric colors without the risk of color bleed or show-through.

In summary, the Tie Interlining Fabric is an indispensable Tie Interfacing Textile for anyone in the garment industry, particularly for those specializing in neckwear and fine shirting. Intended for use in neckties, plackets, and cuffs, this fabric provides the necessary structure and stability to these components. Its white color complements any design without overshadowing the outer material. The Tie Interlining Fabric is a testament to the blend of technology and tradition in the world of fashion, providing the essential support needed to create timeless and elegant pieces.

Features:

Product Name: Tie Interlining Fabric

Color: White

Fusible: No

Handfeeling: Soft/Hard

Width: 110CM

Meter: 100 Meters Per Roll

Applications:

The ZHONGQIANG brand, known for its high-quality textile products, offers a range of Tie Interlining Fabrics, including models 8050H, 8050M, 8050S, 8068, 3044S, and 3044H, designed to provide structure and stability to various apparel items. These products are proudly manufactured in Zhejiang, China(Mainland), and are readily available with a minimum order quantity of just 1 meter, making it accessible for both small-scale designers and large-scale manufacturers.

When it comes to pricing, ZHONGQIANG ensures a competitive edge through negotiation, catering to various budget requirements. The packaging details are meticulously taken care of, with each roll of Tie Interlining Fabric carefully wrapped in a plastic bag to maintain its pristine condition during transportation. With an impressive delivery time of 3-10 days, ZHONGQIANG meets the urgent needs of the fashion industry, ensuring that projects stay on schedule.

The payment terms are straightforward and business-friendly, with transactions carried out through T/T (Telegraphic Transfer), providing a secure and efficient payment method. ZHONGQIANG's supply ability stands at an impressive 200,000 meters monthly, indicating a robust production capacity ready to handle bulk orders without compromising on quality.

One of the standout features of the ZHONGQIANG Tie Interlining Fabric is its excellent heat resistance of 150 , allowing it to withstand the rigors of pressing and ironing during the manufacturing process. This feature makes the fabric a reliable choice for high-quality necktie construction, where maintaining shape and appearance is paramount.

The products are classified as Necktie Interlining, which can be used in crafting elegant neckties, reinforcing plackets, or providing the necessary stiffness to cuffs. With a standard width of 110CM and a classic white color, these interlining fabrics offer versatility and can easily be integrated into various design specifications.

Not limited to traditional neckties, the ZHONGQIANG Tie Interlining Fabric also serves as an excellent Bow-tie Lining Material. The fabric's properties ensure that bow-ties retain their shape and offer a professional look. Additionally, the Necktie Interlining Cloth can be utilized in a variety of other fashion applications, where a crisp and structured look is desired, making it a staple in the garment industry.

Support and Services:

Our Tie Interlining Fabric is crafted with premium materials to ensure a lasting structure and elegant appearance for your tie creations. We take pride in the quality of our product and offer comprehensive technical support and services to assist with any inquiries or issues regarding our fabric.

Our technical support includes guidance on the best practices for handling and cutting the fabric to maintain its integrity and achieve the best results. We provide detailed information on the characteristics and specifications of our fabric to help you understand how to maximize its potential in your designs.

We are committed to providing exceptional customer service. Our team is well-versed in the technical aspects of Tie Interlining Fabric and is ready to assist with any questions related to product performance, care instructions, or application techniques. We strive to ensure that

your experience with our product is seamless and satisfactory.

To further support your needs, we offer a variety of services including product customization, bulk ordering options, and advice on pairing our fabric with other materials. We understand that each customer has unique requirements, and we are eager to work closely with you to meet those needs.

We encourage you to make full use of our technical support and services to enhance your experience with our Tie Interlining Fabric. Your satisfaction and success are our top priorities.

Packing and Shipping:

Product Packaging for Tie Interlining Fabric:

Our Tie Interlining Fabric is meticulously rolled on strong tubes to ensure it remains wrinkle-free during transit. Each roll is then individually wrapped in a clear polyethylene film to protect it from dust and moisture. For added security, the wrapped rolls are encased in a robust plastic bag, which is sealed to maintain the fabric's pristine condition. The final touch is the application of a descriptive label detailing product specifications and handling instructions to ensure proper care upon receipt.

Shipping for Tie Interlining Fabric:

All orders of Tie Interlining Fabric are packaged with great care and are shipped via reliable courier services to guarantee safe and timely delivery. We utilize sturdy cardboard boxes that are perfectly sized to hold the fabric rolls securely during transit. The boxes are sealed with heavy-duty tape and clearly labeled with the recipient's shipping information as well as any necessary cautionary symbols to alert handlers of the contents' delicate nature. We provide tracking information for each shipment, allowing customers to monitor their package's progress until it reaches its destination.
